

ANSHUL VAIRAGADE

CYBER SECURITY ENGINEER

☎ +91 9022425319 ✉ anshulvairagade13@gmail.com 📍 Nagpur, Mahatashtra, India [in linkedin.com/in/anshulvairagade](https://www.linkedin.com/in/anshulvairagade)

Cybersecurity engineer in training with strong hands-on experience in penetration testing, digital forensics, and adversarial security research. Proven background working with Cyber Police investigations, offensive security internships, and organizing national-level Capture The Flag (CTF) competitions. Experienced in building security tools, conducting workshops, and simulating real-world attack scenarios. Focused on developing practical red-team and incident response skills beyond theoretical security.

EDUCATION

Bachelor of Technology in Computer Science Engineering (Cyber Security): St. Vincent Pallotti College of Engineering & Technology, Nagpur (Pursuing)

Higher Secondary Education (Computer Science): Adarsh Sanskar Vidyalaya, Nagpur | (2021 – 2023)

Secondary School Education : Reliance Foundation School, Mouda (2021)

TECHNICAL SKILLS

Proficient Skills :

- **Cybersecurity:** Penetration Testing, Vulnerability Assessment, Web Security, Network Security, Digital Forensics, OSINT, CTF Competitions (Web, Forensics, Reverse Engineering).
- **Penetration Testing Tools:** Kali Linux, Nmap, Burp Suite, Metasploit, Nikto, DNSRecon, TheHarvester, Wireshark.
- **Forensics & Analysis:** Digital Evidence Handling, Log Analysis, Command-Line Forensics(basics), Ghidra (Reverse Engineering).
- **Operating Systems:** Linux (Kali, Ubuntu), Windows (Security Configuration & Analysis).
- **Networking:** TCP/IP Fundamentals, Network Traffic Analysis, Basic Firewall Concepts.

Foundational Skills :

- **Programming & Scripting:** Python (Security Automation & Recon Scripts), Bash (basic).
- **Web Technologies:** HTML, CSS (Web Application Understanding & Testing).
- **Hardware & Wireless Security:** ESP32-based Wi-Fi & Bluetooth Security Testing (handshake capture, rogue AP simulation).
- **Systems & Administration:** Linux System Hardening, Server Security Basics.
- **Version Control & Collaboration:** Git, GitHub.
- **Security Operations:** Incident Response Fundamentals, Threat Analysis (CTF & lab-based exposure).

WORK EXPERIENCE:

- **Cyber Police Intern – Nagpur** June 2025 - July 2025
 - Assisted in digital forensics and cybercrime investigations.
 - Worked on evidence analysis, data recovery, and incident documentation.
 - Gained real-world exposure to law enforcement cyber operations.
- **Cybersecurity Intern – HackSecure(Remote)** April 2025 - May 2025
 - Performed hands-on offensive security testing and adversarial simulations.
 - Worked with real-world attack vectors and vulnerability assessment techniques.
- **Drone Forensics Intern – Aeroworks Technologies** March 2025 - April 2025
 - Studied drone hardware architecture and forensic methodologies.
 - Assisted in flight data recovery and drone evidence analysis.

LEADERSHIP & COMMUNITY:

- **Co-Lead – The Hackers Meetup Nagpur** (Feb 2025 - Present)
 - Organized national-level cybersecurity meetups and technical events.
 - Collaborated with professionals, students, and security communities.
- **Associate IT admin – Phoenix Cybersecurity Club** (Aug 2024 - Present)
 - Trained 250+ students in ethical hacking, Linux administration, and cybersecurity fundamentals.
 - Led workshops, CTFs, and internal security training programs.
- **Joint Secretary – Rotaract Club of SVP CET** (Nov 2025 - Present)
 - Coordinated planning and execution of community service and professional development initiatives.

PROJECTS:

- **Web Threat Analyzer**
 - Developed an integrated vulnerability scanning tool combining Nmap, Nikto, DNSRecon, and TheHarvester.
 - Automated SQL Injection detection, HTTP security header analysis, and web enumeration.
 - Designed to streamline reconnaissance and early-stage penetration testing workflows.
- **Portable Penetration Testing Device (ESP32-based)**
 - Building a compact hardware-based offensive security device for Wi-Fi and Bluetooth testing.
 - Features include handshake capture, WPS exploitation testing, rogue access point simulation, and Bluetooth spoofing.
 - Focused on wireless attack simulation and security research use-cases.
- **KarmaPay – Blockchain Learning Project (Github)**
 - Built a blockchain-powered payment simulation platform from scratch to deepen understanding of decentralized systems.
 - Built a basic blockchain-based payment system to understand smart contracts and transaction flow.
- **APK Decompiler & Malware Analysis Automation Tool (Law Enforcement Use)**
 - Built an automated APK decompilation and analysis tool integrating Apktool, JDK, and Gemini API.
 - Designed to assist cyber police investigators by reducing manual analysis time and standardizing investigation reports.
- **Deployment and Monitoring of Multi-Server CTF Platform (CTFd)**

Technologies: Docker, CTFd, AWS, Linux (Ubuntu), Networking, VPN

 - Deployed and managed an 8-server CTF infrastructure with isolated roles and secure VPN-based access.
 - Orchestrated Docker containers, monitored live traffic, and ensured overall event stability.
 - Customized challenges and integrated a real-time scoreboard to enhance participant engagement.

CERTIFICATIONS:

- Google Cybersecurity Certificate – Coursera
- Certified Network Security Practitioner (CNSP) – **The SecOps Group**
- Cryptography and Network Security – NPTEL
- Privacy and Security in Online Social Media – NPTEL
- Certified Red Team Operations Management (CRTOM) - Red Team Leaders
- CRPO(Certified Ransomware Protection Officer) - ICTTF

ACHIEVEMENTS:

- **1st Place – Capture The Flag, International Cyber Summit (ICYS 2025)**
- Ranked 48th – DEFCON CTF India
- **1st Place** – HackFusion CTF, GHRCEM Nagpur
- 2nd Place – HICATHon 1.0 (National Level), Symbiosis Pune
- 3rd Place – PayFi Mini Hackathon (Blockchain & Cybersecurity), SPARKS 2025
- 2nd Place – **Smart India Hackathon (SIH 2025)**, Internal Round
- Qualified – IIT Bombay Meshmerize Zonals
- **1st Place** – YCCE TechFest CTF

CO-CURRICULAR:

- Technical Head - **EncipherX 3.0 (Technex)**
- Technical Head - **HackersHeist (Cyberpunk 2024)**
- Management Team Member - **Engineers' Day**
- Coordinator - **Cyberpunk 2025**
- Core Organizer - **EncipherX 2026**
